OVERVIEW

The foreign exchange (forex) market is a global, and decentralized or over-the-counter (OTC) market for trading of currencies. This market determines the exchange rates of currencies globally. In terms of trading volume, the foreign exchange is by far the largest market in the world. According to the Bank for International Settlements (owned by 60 central banks), trading in foreign exchange markets averaged \$5.1 trillion per day as recorded in April 2016.

The above shows how juicy and busy the ecosystem of currency trading is. However, the pattern of exchange started taking a new dimension since the introduction of the digital currency in 2009 – the popular Bitcoin (BTC). Currency exchanges which used to be amongst centralized or government controlled currencies, now started involving decentralized currencies that are generated via cryptography and managed on a distributed ledger system known as blockchain. This digital currency is known as a cryptographic currency or simply cryptocurrency.

THE FUTURE

Our future is more of a welcoming, robust and charitable one. Cryptoxygen OU as a well-established venture, will support startups in the ecological sector having innovative products and services that mitigate pollution (water, air, soil, etc) and improve quality of living.

We will also participate to R&D of artificial intelligence through our partnership with Thomson Computing. We simply want Cryptoxygen to give the crypto world and others, a place of ease in the nearest future.

CRYPTOXYGEN PRODUCTS & SERVICES

Cryptoxygen provides efficiently designed platform that handles exchanges from Fiat to Crypto, Crypto to Fiat, as well as Crypto to Crypto trading, with full implementation of advanced mechanisms that take care

care of the different problems facing cryptocurrency industry listed in page 5. Major outcomes of our team's thorough analysis and designs which make up the features of Cryptoxygen are presented here below.

CRYPTOXYGEN EXCHANGE PLATFORM

We provide our customers with the most complete and secure solution in cryptocurrency trading by implementing the most recent and advanced technology in the Blockchain industry.

CRYPTOXYGEN MOBILE WALLET

This wallet will have the following features:

- Secure Mobile wallet
- Biometric authentication to level-up the security
- Transfer cryptocurrencies via QR code
- Track a transaction on the blockchain
- Built-in calculator

CRYPTOXYGEN TOKEN

Cryptoxygen is hereby presented as a token to partake in this fast growing and strong ecosystem. Cryptoxygen is created fully with sound cryptographic algorithm which is aimed at achieving fast transactions, less energy consumption, profitability and security. A total of 250,000,000 (250 million) Cryptoxygen tokens will be introduced and issued.

OXY2 token will provide users of the platform with very low and competitive fees comparing to other competitors.

Our token will also be part of a membership program that will give additional advantages and discounts to our loyal customers.

WHY CRYPTOXYGEN TRADING PLATFORM?

Cryptoxygen platform is a complete solution for cryptocurrency trading starting with the trading platform and ending by the wallet allowing to spend and to store your profits in the most secured way.

Our goal is to bring parallel solutions to the classic banking system which controls customer's funds and charges high fees on each transaction. Cryptoxygen is here to provide our clients with the most secured, highly speed technology solutions and at the cheapest rates through our platform and mobile wallet payment system replacing traditional debit/credit cards.

COMPARATIVE ANALYSIS

	CRYPTOXYGEN	TRADITIONAL BANKING		CRYPTOXYGEN	TENX	EXODUS	BINANCE
CONTROL OF FUNDS	User Controlled	Bank Controlled	MOBILE FRIENDLY	Yes	Yes	No	Yes

SECURITY	Verified Ledgers and "Multi-Sig"	Single Point of Failure	FUND SECURITY	Multi-sig P2SH HD(BP-32) & Cold Storage	Multi-Sig P2SH Hosted Wallet	Regular Software Wallet	Hosted Wallet
CROSS BORDER PAY	Unlimited, Fast, and No Added Fees	Limited by Regulations and Fees	SERVICES	Unlimited, Fast, and No Added Fees	Spending	Secure Storage	Trading
SCALABILITY & INTEGRATION	Instant and Effortless	Slow and Difficult	TOKEN USE CASE	Instant and Efforless	Payments & Payback	No	Exchange Fees (Discount lowers over time)

THE FUTURE

The crypto market which is just 9 years old, now boast of 2,079 other cryptocurrencies after BTC. It also has 15,589 markets, a market Capitalization of \$160,421,105,919 (over 160 billion USD) and most interestingly, a daily exchange average of \$21,506,557,876 (\$21, billion USD).

The transparency, the freedom, the cutting out of intermediaries and the fact that these currencies are not centralized or owned by governments, makes it a comfortable asset for investors or participants who want to explore market opportunities outside their geographical and economic boundaries. Hence, local economy does not affect the worth of this currency. No wonder currencies like Bitcoin, Ether, Litecoin among others are worth more than the world's strongest centralized currency.

With the aid of experience and expertise, Cryptoxygen (OXY2) here presents these challenges or loop-holes in the crypto market, how it is set to resolve them and how its solution will affect not just the financial strength of users but those outside the crypto economy.

THE PROBLEM

PROBLEM SUMMARY

There are more numbers of underlying problems or challenges that Cryptoxygen has on its team's desk. However, those of major concerns are briefly presented.

PLATFORM ADAPTION

This is the space that leads to cheap fraud and discouragements. Every exchange or trading platform on the crypto market simply provides textual guide to using their platform. This means that every crypto novice will have to lose some coins in a bid to practically understand how these platforms work, ranging from trading, gas fees to minimum balance. What happens if all that you have earned goes into trying, either as fees or via non-profiting trades? Not to mention how to secure private keys.

FIAT-CRYPTO EXCHANGE

Lots of preferred exchange platforms do not support Fiat (centralized currencies such as Dollars, Euros, Pounds, etc) to Cryptocurrency exchange. This is mostly due to required licenses and an interest for a less complicated system by vendors. To this end, users will have to use different platforms for transactions that could have been done with one, thereby leaving the users with lots of transfer and gas fees to pay, not to mention the security issues to watch out against.

TRADING VOLUME

There are more numbers of underlying problems or challenges that Cryptoxygen has on its team's desk. However, those of major concerns are briefly presented.

CUSTOMER RELATION

Trading platforms don't put before their users, the opportunity to be reached or contacted, as this may not be on their priority list. Unfortunately, experience is vital in every business environment and lots of users have resolved to unverified opinions due to this defect.

BUSINESS SECURITIES

How much reserve does your trading platform have? Can they payout at anytime? These are the questions that experts wish to ask but get a shaking response for the latter, and none for the former. Some newbies don't even know withdrawals can be delayed until experience explains it. The safety of wallets and transactions is also a major area of concern when it comes to security.

TRADING FEES

Most exchange platforms have very high trading fees and the greater challenge is the stiff nature, unlike the fiat forex that practices swap which is the interest rate differential between the two currencies of the pair you are trading, and it is calculated according to whether your position is long or short. This reduces risk and cost of borrowing if applied.

LISTING COST

According to Autonomous Research, listing an ICO token on a popular crypto exchange can cost promoters anywhere between \$1 million and \$3 million (USD). This means a lot of tokens will not be tradable if these amounts are not rose thereby stopping their solutions from reaching the target audience no matter how good it may be.

SOLUTIONS

TRAINING

In a bid to solve the problem of misguiding newbies on the crypto market, and helping them enjoy their stay and earnings, we have taken out time to provide training services for all users at all levels through the following;

PRACTICE ADD-ON

New merchants, consumers, tech developers, investors, financial institutions and regulators can now practice with an add-on that gives an experience of the crypto market in real-time.

ONLINE CRYPTO-TRADING COURSES

Online detailed courses will also be provided to those who want an extensive knowledge of the crypto trading platform principles, strategies and lots more. This will be arranged, based on the level of expertise and relational objectives.

SOCIAL TRADING

For the first time in the crypto economy, new users can now follow and imitate experienced and successful users on the platform. Most interestingly, new users can copy the trading pattern of experts, so as to start earning more in less time.

EXCHANGE PLATFORM

This is a core aspect of Cryptoxygen. The exchange platform is designed to meet the requirements of an advanced exchange market with the following features:

FIAT-CRYPTO EXCHANGE

Converting centralized currencies (Fiat) such as Dollars, Pounds and Euros to cryptocurrencies will be made as easy and less expensive as never imagined. To this end, TUSD, Tether and EUR will be integrated on for flexibility and easy conversion as well as confirmation. This process can also be vice-versa, wherein cryptocurrencies can be changed directly to Fiat.

CRYPTO-CRYPTO EXCHANGE

The ability to trade multiple currencies on Cryptoxygen makes it one exchange platform that will be widely used, as almost all existing cryptocurrencies will be tradable on it. Speed of transaction is also optimized at this arena with our smart matching engine that beats latency limitations.

MOBILE/WEB APP

Cryptoxygen mobile and web applications are user-friendly, smart, sophisticated and secure. It does not just give the user an access to the trading platform but also provides prioritized services such as preferred notifications, social trading abilities and tips, data management and lots more. Cryptoxygen can be setup or accessed via multiple smartphone OS and web browsers.

LOW TRADING FEES

The trading fees of any exchange can make the difference between profit and loss. For Cryptoxygen exchange, trading fees have been designed to be affordable and attractive. By using our OXY2 tokens, the fees can be reduced by 50%.

CUSTOMER RELATION MANAGEMENT

Cryptocurrency users, for the first time, will enjoy 24/7 online support via email, custom online chat, WhatsApp or Skype with lots more, if using Cryptoxygen Account Management and Safety sub-system. The target is to provide prompt responses to requests, gather experience data and manage users. It's all about KYC (Know Your Customer) and experience management.

SECURITY SOLUTIONS

Unlike common exchange platforms, we provide security in diverse means such as:

Cyber Security

This is the most basic but core aspect of security that is needed for any crypto platform. For Cryptoxygen, this is more than basic as we provide Advanced Control Service layers to secure fund movements (orders and withdrawals) with continual system consistency checks at real-time. Not to stop there, Cryptoxygen implements a decentralized method of storing all sensitive data based on Shamir's Secret Sharing algorithm. With these and more implementations that are not to be mentioned here, Cryptoxygen wallets, backend systems as well as transactions will be well secured.

Legal Safety

The most dreadful part of establishing a crypto market is the acquisition of Licenses in order to extend services due to cost and compliance procedures. For Cryptoxygen, we are not joining others in taking the simple and unsafe route. Cryptoxygen is a fully regulated company with licenses approved by FIU and by FSA allowing to trade cryptocurrency against Fiat Currency and to operate a virtual currency Wallet service.

Operational Safety

Cryptoxygen is set to make withdrawals, especially as fast as never. This, it intends to achieve by having a lot of reserve funds that will maintain steady operations mostly at peak periods or fluctuating market points. This will also secure users' funds and the venture from going bankrupt or die from pressure.

SMART LISTING

Cryptoxygen is an exchange that is set to offer smart solutions to crypto investors by making its listing requirement less expensive yet highly analytical. On this basis, tokens will not just be listed because the vendors can afford the fees rather, the market/impact potentials will be the major determinant. This will make Cryptoxygen an exchange for promising tokens rather than just having rich vendors with low market strength or projection.

CRYPTOXYGEN EXCHANGE PLATFORM SECURITY TECHNOLOGY:

Google 2FA Authentication

Google Authenticator 2FA is a software token that implements two-step verification by using a time-sensitive One-time Password (OTP) and HMAC-based OTP Algorithm.

SMS Authentication

Another form of optional two-factor authentication, by sending an SMS, One Time Password (OTP) to users when verifying any account or transaction activity. Users will have to enter the current OTP in order to complete verification.

Third Party Payment Processor

Cryptoxygen uses a third party payment processor for all fiat transactions to provide extended security on all platforms. Our payment processor uses advanced encryption for all payment and personal data provided to our platform. By using this payment processor, Cryptoxygen can focus on staying ahead of fraud and preventing problems before they occur. (Please remember during the KYC process that all information given to Cryptoxygen during account creation must match all information provided to the third party company for fiat operations to be available on your account).

CRYPTOCURRENCY EXCHANGE FEATURES

- ✓ Low trading fees
- ✓ Online trading academy
- ✓ Social Trading
- ✓ Streaming news
- ✓ 23 available tokens for trading

Our exchange will allow our users to trade 23 most traded coins in the world, with exchanging pairs:

PARTNERSHIP

Aside exploring the basic promotional patterns, Cryptoxygen's partner is Thomson Computers, which has 36% share of the European market. This company has been in the market since 1984, and it is an innovative and fast developing brand at the international level. Cryptoxygen platform will therefore be integrated directly in each laptop that is branded by Thomson. Globally, sales of 1million Thomson PCs are made per annum. Such distribution will make Cryptoxygen platform advertised through customers and users of Thomson Computing brand. Potentially, we could add about 100,000 new users every year through the sales of these products alone and substantially increase usage of our tokens which will result in appreciating of our token value.

Available on

Desktop Microsoft Windows, IOS, and Android systems.

CRYPTOXYGEN MOBILE WALLET FEATURES

ⓘ Secure Mobile wallet

Our secure mobile wallet allows you to store cryptocurrencies while ensuring the highest level of security and pay these currencies to anyone across the globe safely.

ⓘ Biometric authentication to level-up the security

The process to send or receive cryptocurrencies is initiated after the users complete the biometric authentication process to verify their identities. This provides the best security against cyber attacks.

ⓘ Transfer cryptocurrencies via QR code

Cryptoxygen wallet comes with a QR code that can be easily scanned to get the address quickly and accurately. It provides a secure way to transfer cryptocurrencies.

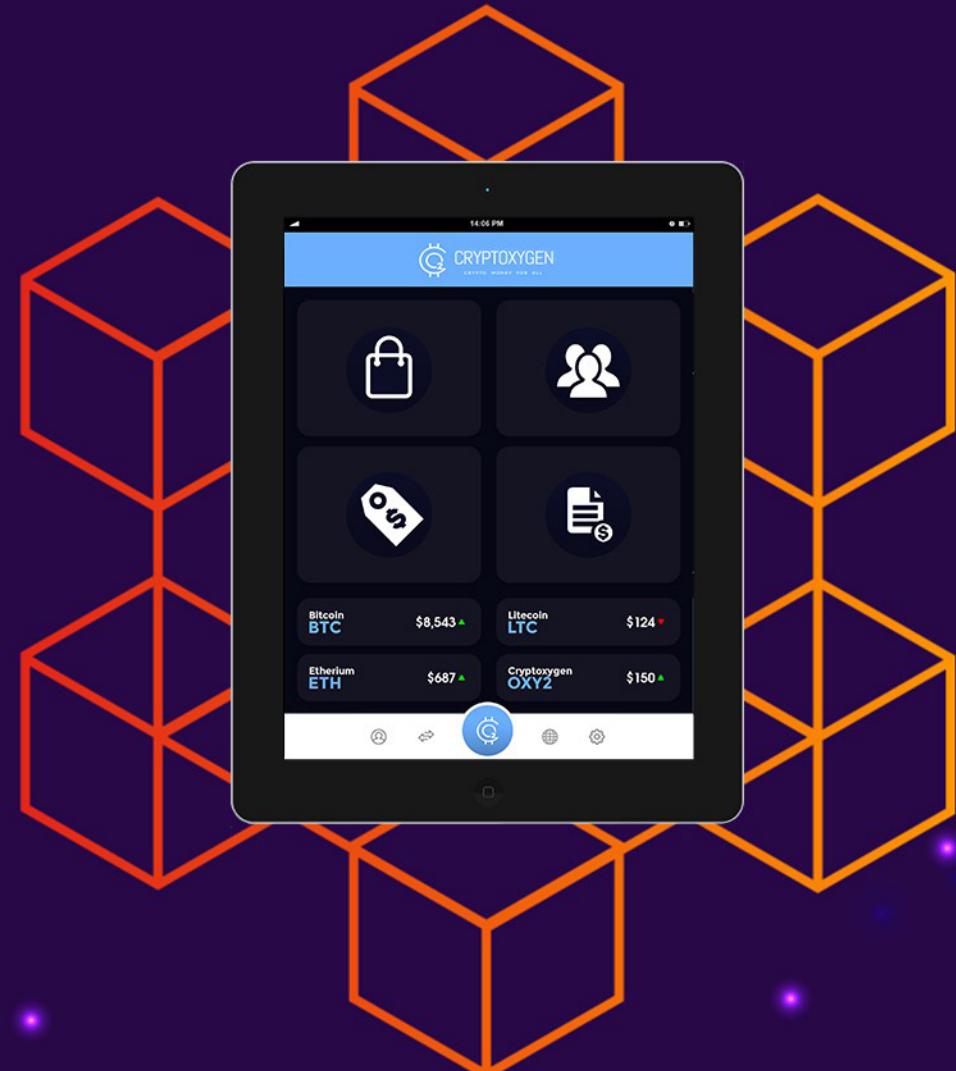

ⓘ Track a transaction on the blockchain

Whether you are sending or receiving your cryptocurrencies, the platform allows you to keep tabs on your transactions in real-time.

ⓘ Built-in calculator

The built-in calculator makes it easy for you to make any calculations required, without the need to leave the platform.

Available on

USER INFORMATION

CUSTOMER RELATION MANAGEMENT

Cryptocurrency users, for the first time, will enjoy 24/7 online support via email, custom online chat, WhatsApp or Skype with lots more if using Cryptoxygen Account Management and Safety sub-system. The target is to provide prompt responses to requests, gather experience data and manage users. It's all about KYC (Know Your Customer) and experience management.

KNOW YOUR CUSTOMER

Cryptoxygen also aims to abide by all anti-terrorism and money laundering guidelines set forth by international regulations to ensure a safe world for the next generation. Any transactions that involve a credit card or fiat operations on our platform will require more user information for verification. The verification process will be brief and bypass most traditional paperwork. It will only need to be completed once per account unless user information or preferred payment method changes.

All user information on their Cryptoxygen account must be an exact match to the payment method they have entered for withdrawals and deposits. To ensure user information is correct and not fraudulent.

Cryptoxygen will be using an advanced third party processor. This company uses artificial intelligence paired with facial recognition to verify credentials loaded by our users. Depending on where the user is located, we will require different forms

of identification. We understand that some areas of the world may not have state of the art documentation processes like the United States or European Union. However, we will do our best to verify users based on information and processes available from local governmental agencies and identification services. Know Your Customer guidelines are in place to check for a few main factors when dealing with user information. The main features include transaction monitoring and risk management.

This helps to protect both the integrity of our platform and the cryptocurrency community in general. Cryptoxygen, as a registered company in Malta, has to abide by all local laws and regulations set forth regarding cryptocurrency platforms and exchanges. If information on a user is requested we promise to work with governing agencies to have problems resolved.

*Please remember any transactions done relating to a transfer including FIAT payments must pass KYC verification. If your account is suspected of breaking international terrorism or money laundering guidelines Cryptoxygen will suspend or close your trading account.

FEE STRUCTURE

Cryptoxygen's revenue will be generated from transactions on our exchange and POS system. Small commission fees will be assessed towards every purchase of cryptocurrency using a credit card or bank transfer. Fees on our exchange will always remain competitive and subject to change. The OXY2 token will allow users to move funds between our exchange and wallet without any fees.

(Please note that this does not include network transaction and miner fees. Please research network fees associated with each exchange option before using our system. Some cryptocurrencies can be more expensive to send based on their respective network fees.)

Fees on our exchange will always remain competitive and subject to change. Cryptoxygen reserves the right to change fees at anytime and will notify the public of any changes made to our platform.

Service	Type	AMOUNT
Debit / Credit Card	Ingoing / Outgoing	4%
Cryptocurrency Exchange	Trading / Transfer	0.10%
Cryptocurrency Exchange	OXY2 Token	0.05%
Exchange Withdraw	Withdraw / Outgoing	0.50%
Multi-Signature Transaction	Outgoing	0.20%
Transfer OXY2 from Wallet to Exchange	Use Case	0.00%

CRYPTOXYGEN TOKEN

Cryptoxygen launches OXY2 token once the Initial Coin offering will go live. Our token is based on Ethereum and developed on ERC20 platform. It's an utility token that will provide our platform users with special services and advantages listed below.

USE CASES FOR THE OXY2 TOKEN

ZERO FEE FROM TRANSFERRING TOKENS FROM CRYPTOXYGEN PLATFORM TO CRYPTOXYGEN WALLET

It's a secure solution for users that would like to store their tokens outside of our platform. All transfers that are made from our platform to Cryptoxygen wallet will be free of charge.

LOW TRADING FEES

Users of Cryptoxygen platform can reduce their trading commission by using our OXY2 tokens and fees would be as little as 0.05%.

MEMBERSHIP AND LOYALTY PROGRAMS

Cryptoxygen will offer to its loyal customers special memberships that will allow to have additional advantages in trading fees as well as to have some upgrades on our platform services and access to online trading courses.

CRYPTOXYGEN WALLET FEATURES:

Our Cryptoxygen wallet provides with secure solutions to store and to manage your digital assets at any time.

- Multiple Blockchains: ETH, BTC, LTC
- Secure storage of digital assets
- Build in calculator for conversion
- Instantly updated rates
- Send/Receive tokens
- Payments by using QR code

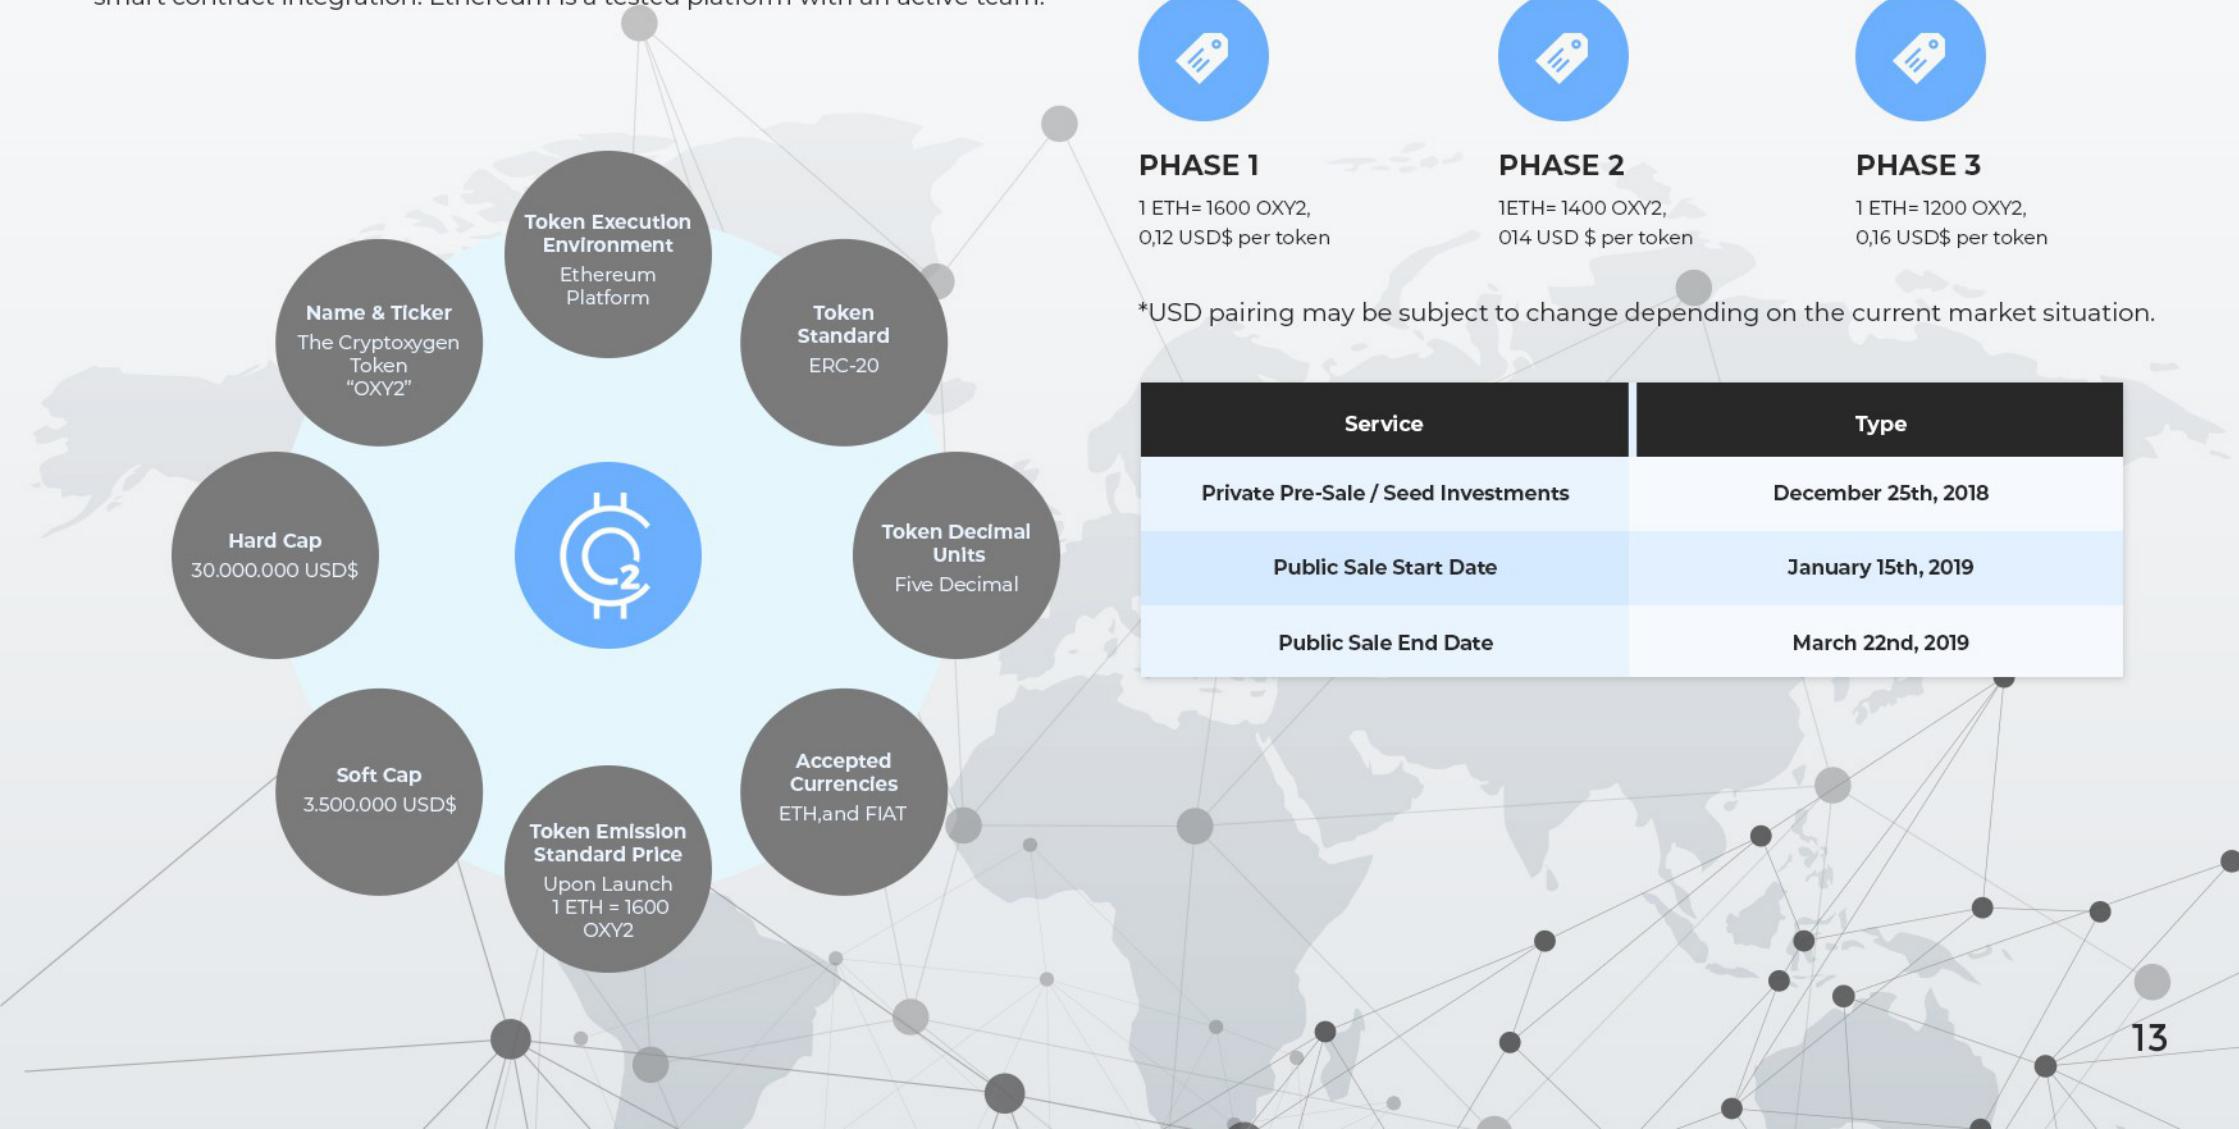

Available on

Desktop Microsoft Windows, IOS, Mobile Apple and Android systems.

THE 'OXY2' TOKEN SPECIFICATIONS

The Cryptoxygen token has been designed from the ground up on the Ethereum ERC-20 platform. We chose this platform for its security features and smart contract integration. Ethereum is a tested platform with an active team.

CRYPTOXYGEN ICO

With this project, Cryptoxygen, OXY2 is set to follow the price movement of the top 5 largest digital or cryptographic currencies currently in the cryptomarket. Also, Cryptoxygen seeks to provide a highly valued financial asset to its investors, at the same time provide information that will help all investors, those with adept knowledge of the market and others, to make smart investment decisions that will leave them with astonishing returns.

Cryptoxygen therefore, seeks to raise funds that will be used as its startup value, as well as fund the development of its platform, promote it and enhance incorporations that will give it a place in the market.

Over 50% of the total tokens will be placed for sales to the public which amounts to 150,000,000 OXY2 token. The standard price of the token at the start of sales is \$0.18 per OXY2 token, assuming price of ETH at \$190 (USD). The sales will be in 3 phases with the first as the cheapest.

BREAKDOWN OF ICO TOKEN DISTRIBUTION PLAN

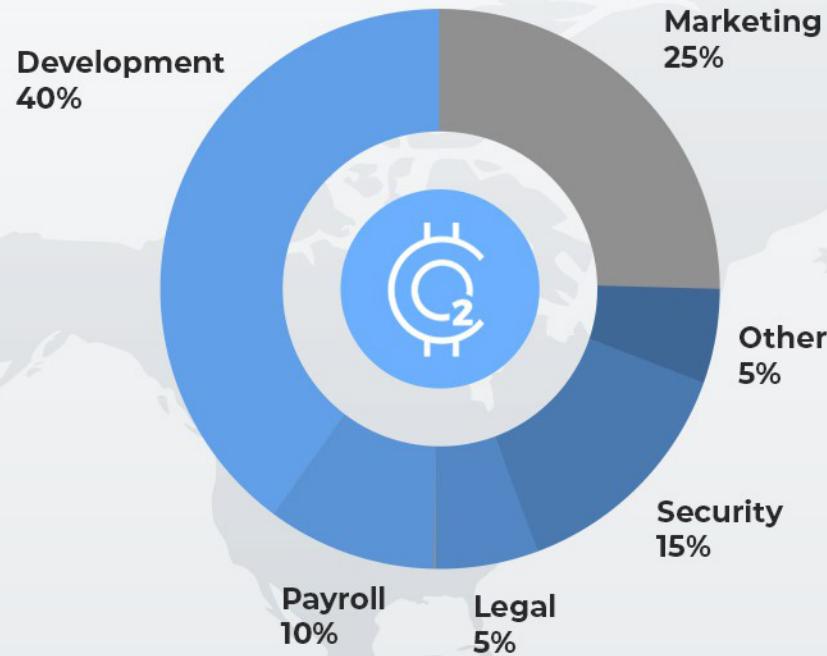

HARD CAP	30.000.000 USD\$
SOFT CAP	3.500.000 USD\$
TOKEN TOTAL ISSUE	250.000.000 OXY2
SALES TO PUBLIC	150.000.000 OXY2
STANDARD PRICE OF TOKEN AT EMISSION OXY2	ST 0,18\$ ASSUMING PRICE OF ETH: 190\$
PHASE 1	1 ETH=1600 OXY2
PHASE 2	1 ETH=1400 OXY2
PHASE 3	1 ETH=1200 OXY2

TOKEN DISTRIBUTION BREAKDOWN:

Any tokens from the public ICO that are not claimed after the initial coin offering will be used for airdrops, extra bounty programs and future customer contests. Our platform will not block any specific countries from participating; however, it is the responsibility of investors to know their country's rules and regulations pertaining to cryptocurrency. If the ICO reaches hard cap early, the project will start. Expect all OXY2 tokens purchased through our ICO to your Cryptoxygen account within two business weeks of ICO end.

ICO FUNDS DISTRIBUTION

MARKETING DEVELOPMENT

Cryptoxygen will be using 25% of ICO funds in order to create our brand awareness across the world and to promote our platform and services through the distribution of more than one million Thomson laptops and tablets distributed around the planet.

Our spirit of the company, is to spread our products and services not only exclusively by cryptocurrency industry but also through traditional IT products sales.

In the later stage of our development, we are going to set up a Cryptoxygen Lab that will support some environment protection organizations and will invest in selected start-ups with ecological and artificial intelligence projects.

OUR FIRM

Cryptoxygen OU has a registered office in Tallinn, Estonia. Estonia - a country in Northern Europe, is known to be a crypto-friendly country with favorable regulatory environment and one of the best FinTech places in the world.

Cryptoxygen OU is governed by its executive team and corporate board of directors. In the future, Cryptoxygen OU might accept new investments in the form of venture capital or conduct security issuance on regulated markets that might affect the goals and visions presented in this white paper.

Holders of OXY2 tokens will also be able to propose and vote on listing activities, new product features, and endeavors concerning the operations of Cryptoxygen OU. Voting results will however, not be legally binding, and Cryptoxygen OU will not be obliged to follow the results.

CONCLUSION

Cryptoxygen is just the perfect solution to what aspiring and current crypto-users look out for on the crypto-market. The solutions are sound, the techniques are unique and the processes are legitimate.

Why you should invest in OXY2? This is a question for an unclear project. With the brief description of Cryptoxygen in this paper, the smart question should be what the ICO date of commencement is. Every smart investor that seeks to diversify his/her portfolio should look up to Cryptoxygen for safe asylum.

In our view, the cryptocurrency market will develop at a pace set by the key participants, characterized by likely growth spurts of legitimacy from one or more of these participants in what we call "credentialising moments". For the market to reach the next phase in its evolution toward mainstream acceptance and stable expansion, each of the five key market participants - merchants and consumers, tech developers, investors, financial institutions and regulators - will have to play a role.

Cryptoxygen is not just smart, it's a safe place to play your role as well earn what you deserve.

DATA PROTECTION

All data subjects, whether individuals or companies, will have the option to request an absolute removal of all their data that is guaranteed by a third party and fully verifiable. All communication between server and client is encrypted. Pseudonymization will be applied via a separate module within the Cryptoxygen exchange core architecture, thereby guaranteeing maximum data protection and control for our clients and partners in strict compliance with Regulation (EU) 2016/679.

Additionally, Cryptoxygen OU and all its subsidiaries will appoint an independent and professional Data Protection Officer (DPO) who will be responsible to monitor all data subjects on a wide scale continuously and systematically.

Cryptoxygen OU DPO will also have direct access to all board meetings, internal data systems, and data-related subjects of the Cryptoxygen OU board and its subsidiaries.

AML/KYC POLICY

Cryptoxygen OU Anti-Money Laundering (AML) and Counter Terrorism Financing (CTF) Policy is designed to prevent money laundering and terrorism financing by meeting the European AML legislation standards including the need to have adequate systems and controls in place to eliminate or at least mitigate the risk of the firm being potentially used to facilitate illegal financial activities.

Internal AML Policy will set out the minimum standards which must be complied at all times. The cornerstone of the AML policy will be an appointment of an independent Counter Terrorism Financing and Money Laundering Officer (CTFMLO) with strong experience in security, compliance and counter terrorism who will have responsibility for oversight of compliance with relevant legislation, regulations, rules and via and maintaining a Risk Based Approach (RBA) towards monitoring and managing the money laundering and terrorist financing risks to Cryptoxygen OU.

Secondly, we will require enhanced and strict risk-based customer due diligence, identification, verification and know your customer (KYC) procedures, including in depth due diligence and continuous monitoring for those customers presenting higher risk will be present within the platform.

Cryptoxygen OU is strictly prohibited from transacting with individuals, companies and countries that are on prescribed sanctions lists, the company will therefore screen against United Nations, European Union, UK Treasury and U.S. Office of Foreign Assets Control (OFAC) sanctions lists in all jurisdictions in which we will or might operate.

DISCLAIMER

This white paper is strictly provided by Cryptoxygen OU, ("Cryptoxygen OU," "COMPANY" or the "PROJECT"), for informational purposes only, and therefore it does not constitute an offer or a solicitation to buy or sell any securities or any other financial instruments or its derivatives.

The Cryptoxygen Token is a semi-consumptive use product permitting access to the services and benefits provided by the cryptoxygen Platform, as detailed in the white paper.

This paper describes only the current vision for the Cryptoxygen project. While Cryptoxygen OU intends to attempt to realize this future vision, please recognize that it is dependent on many factors and subject to substantial legal, regulatory, and technical risks.

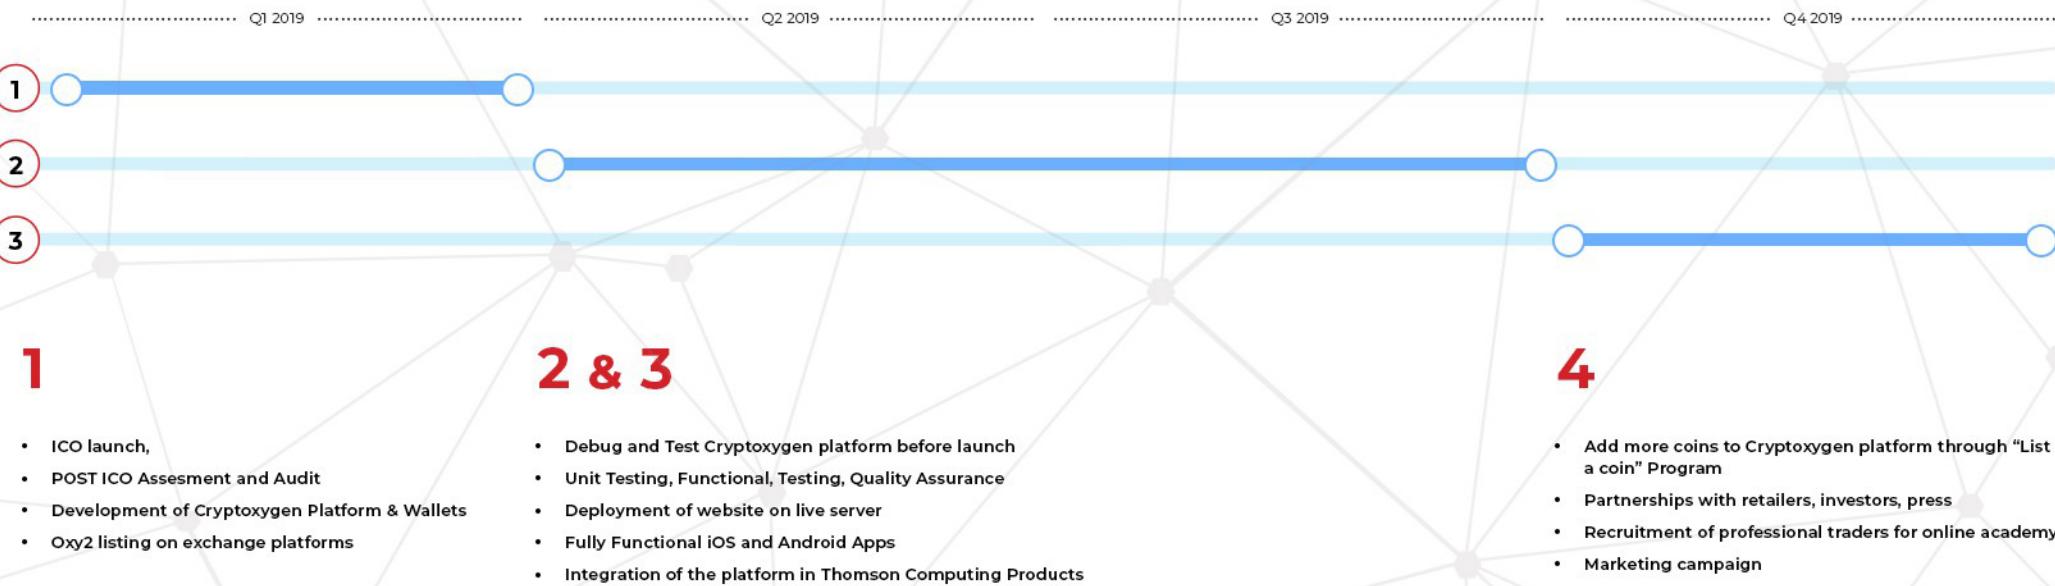

It is entirely possible that the cryptoxygen vision will never be implemented, or that only a portion of our vision will materialize. Cryptoxygen OU and its founders, therefore, do not guarantee, represent or warrant any of the statements in this white paper, because they are based purely on our current expectations and assumptions, about which there can be no assurance due to various anticipated and unanticipated events that may occur.

The OXY2 token is a purely functional utility smart contract bound to services and benefits provided only by Cryptoxygen OU and its subsidiaries.

In the future, OXY2 tokens might have a value of zero. Any proceeds from OXY2 token distribution events may be spent freely by cryptoxygen absent of any conditions whatsoever.

ROADMAP

CRYPTOXYGEN TEAM

STEPHAN FRANCAIS

Chairman, Co-Founder

Graduated from a Master of business creation in Paris X, but also a DEA in political science and a PhD in political science whose subject was the development of an axis of cooperation between Asia and France. At the end of his studies, he decides to embark on computer science in the PPR group
